

To whom it may concern,

Honda Australia's warehouse staff have recently completed the workplace training course Certificate III in Transport & Logistics (Warehousing & Storage) and found it to be extremely beneficial.

Choice Training Solutions and their trainer, Darin Phelan, were able to develop staff knowledge of the subjects covered and improve skills in many areas. He related topics to their work environment and used a variety of assessment tasks to help them recognise and introduce benefits and improvements in the warehouse.

The course was tailored to improve our warehouse staff skill level and knowledge of the business, but flexible enough to allow the trainees to develop at their own speed and using their own initiative.

There was little or no impact on our business with regard to time away from duties and the documentation relating to the traineeship was also processed with minimal disruption.

I would recommend Darin and Choice Training Solutions to any company wishing to develop their staff with on site training.

Please note, this is a personal reference and is not on behalf of Honda Australia Pty Ltd.

Kind regards

Stacy Carroll
Human Resources Assistant Manager
